Abstract: -- The work is take up with completely different analysis. The paper provides proofing of action of generating modulating resource of signal in human body, this kind of intuition not materialized in technical, physical, engineering research. Everyone knows the concept of Aura, is natural energy associated with all living organisms. But the typical study here is the behavior of human Aura is mysterious. I wonder about Aura, ten years back I had information that the Aura can Expandable maximum up 27 feet's. I started research since past ten years by investigation and experimenting by own ,found so many hidden behaviors of Human Aura. My innovation is "Human Body is the best Generation and modulation machine of signals with associate field called Aura. Aura is the Electromagnetic field generated by the human body, the reason for electromagnetic field is the potentials produced by neurons. I found human Aura have four different colors 1) Block 2) Red 3) Yellow 4) White spectrums, every person has only one kind spectrum but we can change spectral characteristics by using certain process. Every person has by nature, have base frequency those are mention above. The paper has information how the interaction happens between different Auras? In that journey, I found 16 possible spectrums and their interaction B-B, R-R, Y-Y, W-W, B-R, B-Y, B-W, R-B, R-Y, R-W, Y-B, Y-R, Y-W, W-B, W-R, W-Y. Like Kind field interactions emits Low Heat energy and other emits heat , how much quantity is emitted, based on combined patterns.

Keywords—Aura; Fields; Natural Energy; Modulator, Generator

My Inovations

I. INTRODUCTION

So many questions are running minds what I would like mentions in introduction, started fair question, you know what if a person watches adult materials in videos, how they can induce sexual feelings, I mean there is no real person to expose sexual feelings, a material can induce feeling in person. Someone may angry around us, after some time we also influence same situations. Another example is let me speak about watching some sad movies, in that situations we feel same feeling what exactly actresses follows. Watching devil movies, we felt same fear what they felt. So here the world of scientists needs to understand the concepts of how the materials can influence people or people can influence outer world. The simple answer for this is field Induction. which means, the human body associated with natural energy called Aura. Here my innovation is "if the person is inn mood of sexuality or angriness or happy, whatever the feeling they has, the same information can be embedded with so call natural energy Aura. The Aura is exposed to nearby environment or person induces same field, which means that to whom he exposed same situations will be induced another people. So finally, the nearby environment is attaining the same of sending field.

Aura is the Electromagnetic field generated by the human body, the reason for electromagnetic field is the potentials produced by neurons. I found human Aura have four different colors 1) Black 2) Red 3) Yellow 4) White spectrums, every person has only one kind spectrum but we can change spectral characteristics by using certain process. Every person has by nature have base frequency those are mention above. The paper has information how the interaction happens between different Auras? In that journey, I found 16 possible spectrums and their interaction B-B, R-R, Y-Y, W-W, B-R, B-Y, B-W, R-B, R-Y, R-W, Y-B, Y-R, Y-W, W-B, W-R, W-Y. Like Kind filed interactions emits Low Heat energy and other emits based combined patterns. This philosophy took from physics that if I heating Iron ROD, generally rod goes through this process, in Muddy Block Color – Red – Yellow- White. Likewise, the persons exist in nature are defined by me experimented found those four categories. According rules of electricity if two bodies are at same frequency and impedances matches maximum power is transmitted between two bodies. Unmatched frequencies radiate huge heat energy. That heat energy disturbs the nearby nature. That's why so many person's opinions are not coincidences together because of unmatched human aura. The amount of heat generated is depend on the which kind spectrum of spectrum happens. Human Aura may expand up to boundary of the universe by using well defined generation of frequency by human body.

The radiated can approach any random functions like

- 1) Gaussian
- 2) Exponential
- 3) Uniform
- 4) Rayleigh functions
- 5) Depending upon situations .

CONCLUSIONS

The studies in human Aura is like kid which at home, means the researches are concentrating everything based on past studies. the researches need to have intuitive mind. Human body is an ultimate device to produce variable field and signals, that field may also expandable up to universe ending. The aura is the source for curing health disorders like mental stability, changing attitude., Controlling another people with Aura. The study of me makes the researchers to think in different way about Aura.

Acknowledgment

I would like mention immense pleasure to My Guru, Sri Rajanala Srinivasa Murty garu, without valuable suggestions of him , I can't complete this work. And I would like to thankful to my student Mr. N.Pavan third Year Student who did required animation regarding to concepts . And also I am thankful to the following persons to share their own true experiences helpful a lot to build this papers, Mr. K Kishore Babu, Mr. Bhagyasankar, Ms.Yogitha Sri Saranya, K. Yamini , M.N.L Aparijitha and all my students
